SINEE

Since SINEE establishment in 2003, Shenzhen Sine Electric Co., Ltd. (abbreviation: SINEE) has focused on the research and development, production and sales of motor drive and control system products in the field of industrial automation. With the vision of "automated production and life", SINEE continues to provide valuable products and services to users. The company was listed on the Shanghai Stock Exchange's Science and Technology Innovation Board in 2021 (stock code: 688395), and currently has R&D, production and service bases in Shenzhen, Wuhan, Suzhou and Wuxi.

Automated Production and Life

Company has key core technology platforms such as high-performance variable frequency vector control technology, high-precision servo drive technology, embedded computer control technology, and power electronics application technology. SINEE mainly provides frequency converters, integrated special machines, servo system products and system solutions for mechanical equipment manufacturers and electronic control system integrators.

Vision

Automated production and life

Business

Motor drive and control system solution provider

Customers

Mechanical equipment manufacturers, electronic control system integrators, distributors

Competitiveness

Industry market solutions and customer customization

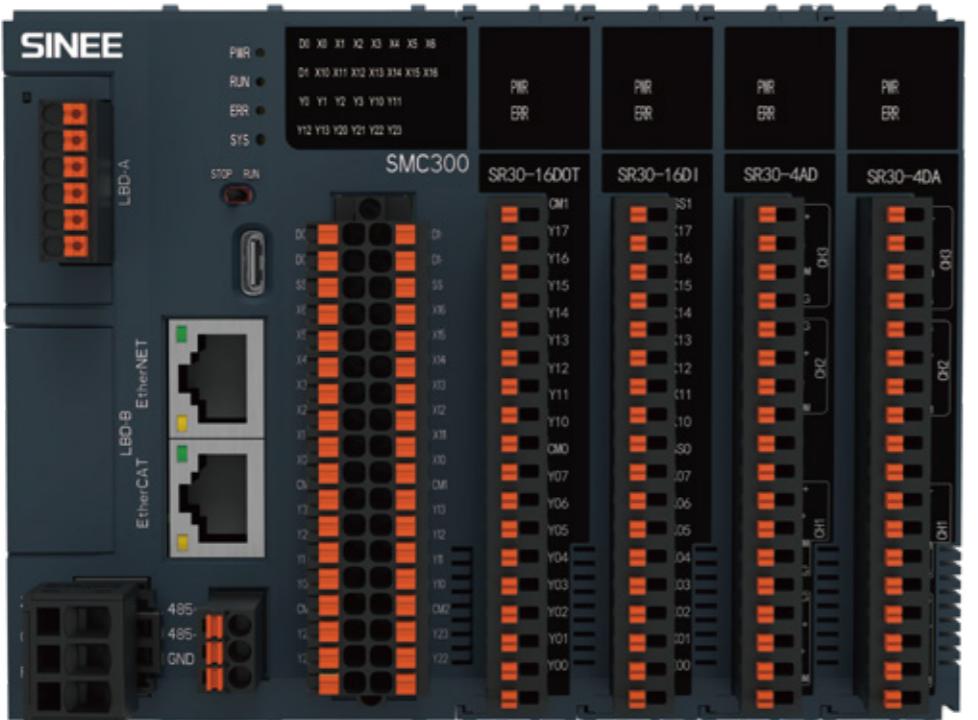

Business philosophy

Customer-centric, achieving simultaneous growth of own value and customer value

SMC300 Series Motion Controller

SMC300 medium motion controller adopts IEC61131-3 programming language system and supports PLCopen standard programming language. Adopting a rack layout, each CPU supports local expansion of 16 expansion modules, and the CPU can be remotely expanded through EtherCAT.

Fast&Convenient

Fast execution speed + convenient operation

Multiple Bus

Standard Ethernet, compatible with multiple communication protocols

Superior Performance

32-axis bus control to achieve complex processes

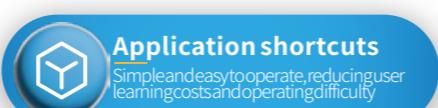

Flexible Expansion

Expansion modules + optional accessories to meet various usage scenarios

Easy Development

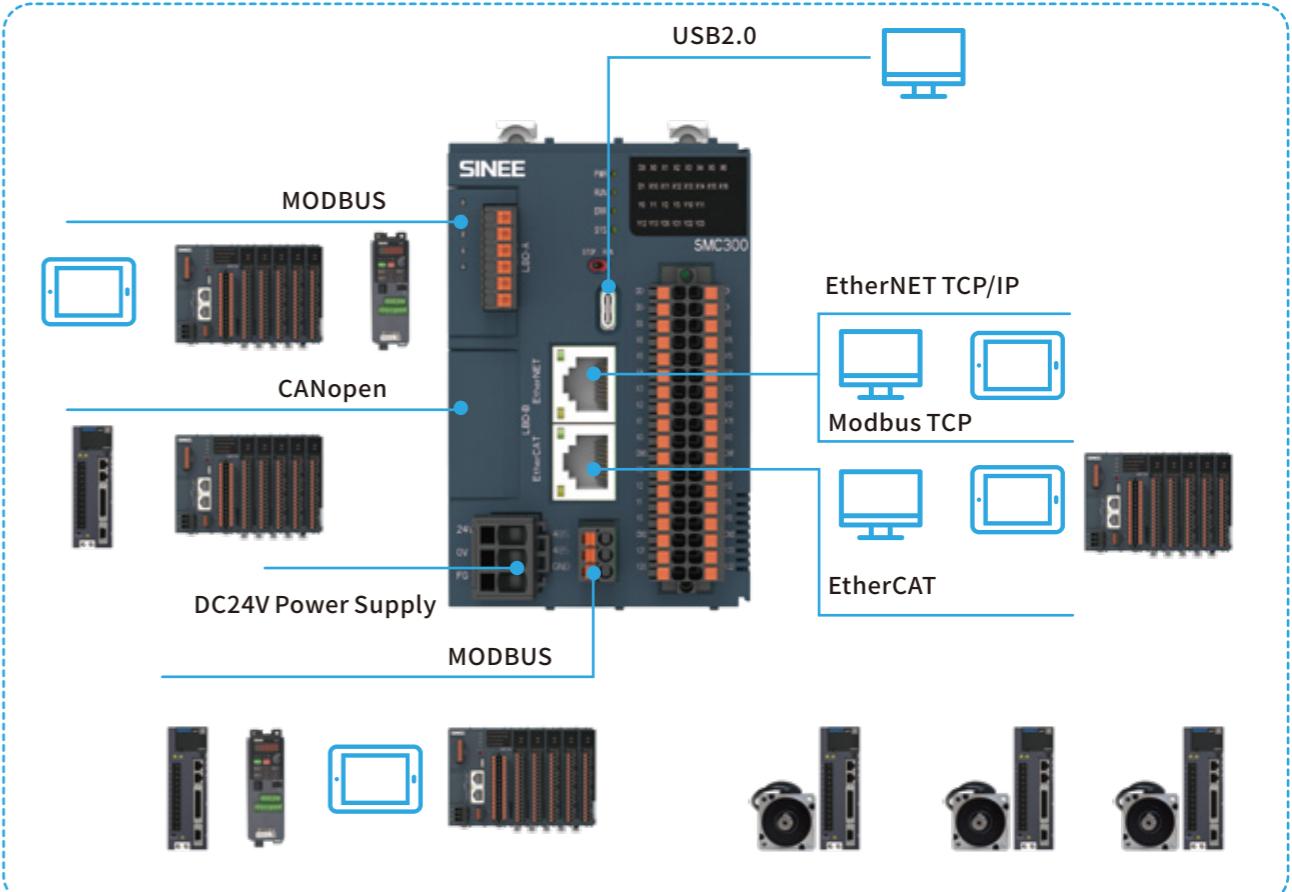

Multiple programming languages, easy to write complex logic

Application shortcuts

Simple and easy to operate, reducing user learning costs and operating difficulty

Convenient Connectivity

Flexible Expansion

The left side supports max simultaneous insertion

2 expansion modules

RTC, CANopen, 485/232, DI, DO

The right side supports max simultaneous insertion

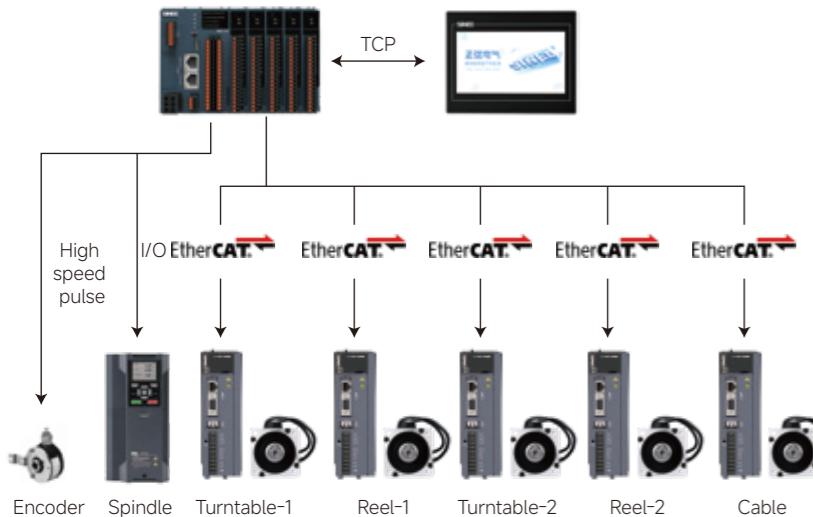

16 expansion modules

DI, DO, AI, AO, TC

Cable industry taping machine system solution

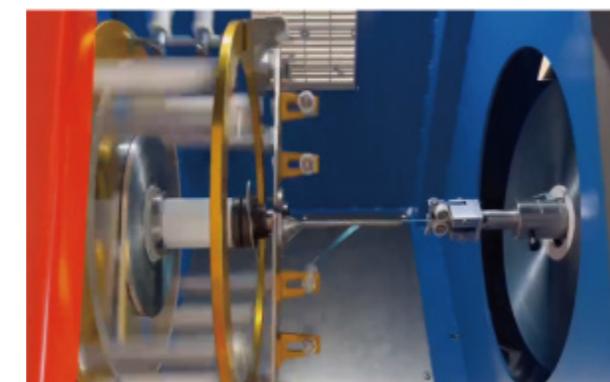

The taping machine is driven by a motor, which drives the rotating parts to make the taping reel rotate at a constant speed, and evenly wraps the tape in a spiral or overlapping shape on the cable moving forward at a constant speed, thereby realizing the taping operation of the cable. In this process, there is usually a tension control system to ensure that the tape maintains appropriate tension during the winding process, so that the tape is tightly and evenly wrapped on the cable surface.

System Solution

Solution Advantages

- The turntable speed is stable, and the speed fluctuation from 100-1500rpm is within 1rpm
- The tape tension is stable, and the tension fluctuation is less than 3%.
- From acceleration to full speed, the wrapping point has almost no drift
- Pitch stability
- EtherCAT bus control, high-speed communication, simple wiring
- Simple operation, one-button start
- Complete alarm mechanism: belt break alarm, wire break alarm, door open alarm, pallet anti-collision, servo alarm, inverter alarm, cable limit

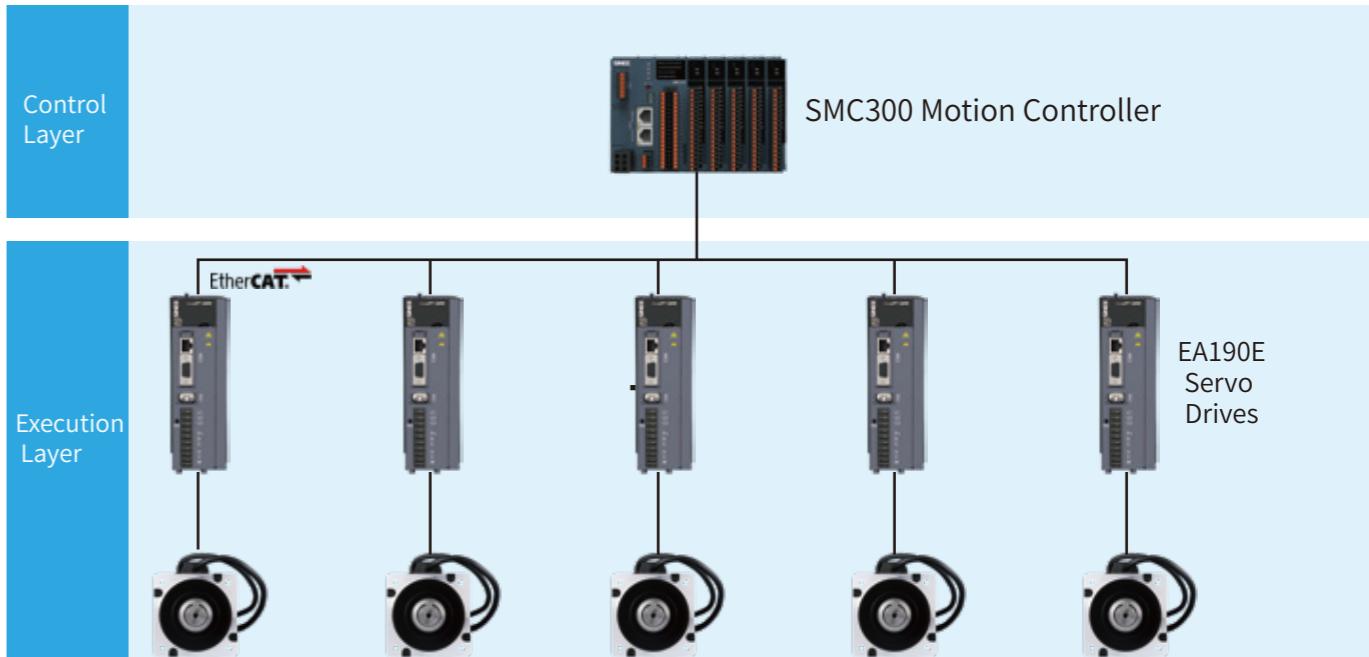

Logistics industry Single piece separation system solution

The single-piece separation equipment is part of the self-service logistics sorting system. It can pre-process the parcels and automatically separate and intelligently arrange the scattered, parallel, and different-sized parcels, so as to arrange the parcels into single pieces with uniform spacing.

System Solution

Solution Advantages

Load capacity up to 70KG	99.9%	6K-10K/Hour
Heavy Separation Burden	High separation success rate	High separation efficiency

- Easy to install: EtherCat communication is used for easy wiring, which improves assembly efficiency and saves debugging time
- Easy maintenance: When a device fails, the faulty unit and the cause of the failure can be accurately located. If a single drive fails, the entire line will not be shut down, reducing maintenance time
- Wide adaptability: Supports TCP free protocol, the complete system is basically compatible with all visual brands on the market

SMC300 Series Motion Controller---Naming Rule and Specification

Product Dimensions

SMC 300 - 032E - XX

(1) (2) (3) (4) (5)

Product Categories	Series	Axis	Instruction Type	Non-standard customization
SMC	Motion Controller Host	300 300 Series	032 32 Axis	E EtherCAT

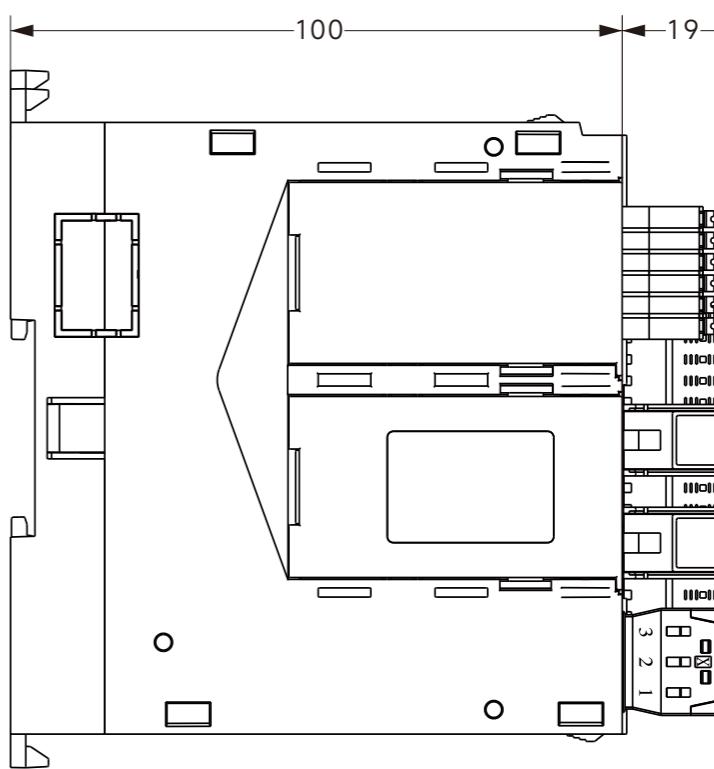

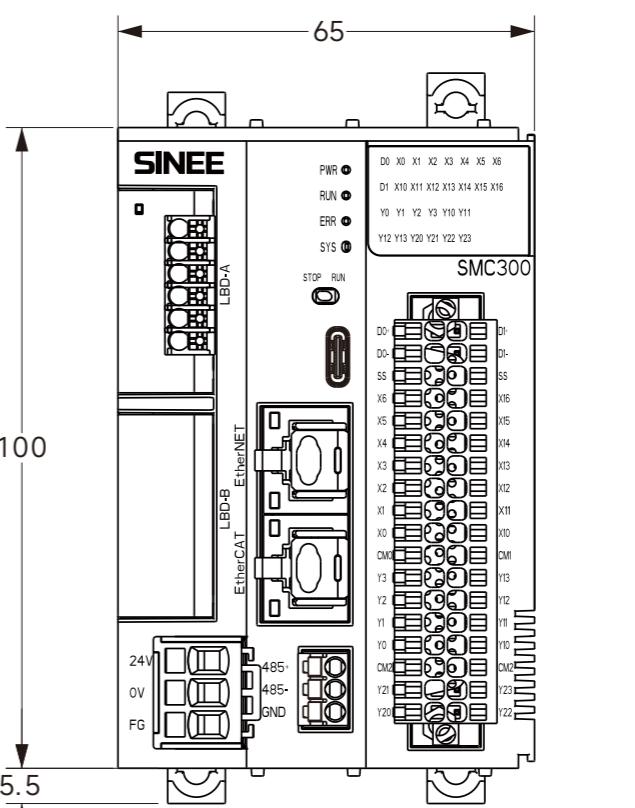

Model		SMC300-006E	SMC300-008E	SMC300-012E	SMC300-016E	SMC300-032E
Programming capacity	Program data capacity	20MB				
	Power-off retention capacity	120KB				
Programming language		IL, SFC, CFC, FBD, LD, ST				
Axis Capacity	Number of pulse axes	—				
	Total number of axes	6	8	12	16	32
Right Extension	Max right extension amount	16				
Optional Accessories	Max number of optional cards	2				
Host IO Point	Input Points	12 points normal input + 4 points high speed input				
	Function	4-way 200K high-speed pulse input (AB phase, pulse + direction, single pulse)				
	Output Points	8 points normal output				
	Function	—				
USB	Number of interfaces	1 Way USB2.0 TYPE-C				
	Support Functions	Firmware Upgrade				
Power supply		DC24V				
Serial Port	RS485	Number of interfaces	Max 3 channels: 1 channel built into the host, 2 more channels can be added by installing optional accessories			
		Support Protocol	Modbus master and slave; free protocol			
		Max number of slaves	125			
		Baud rate bps	9600, 19200, 38400, 57600, 115200			
Serial Port	RS232	Number of interfaces	Maximum 2 channels: The host does not support it, and it can be expanded to 2 channels by installing optional accessories			
		Support Protocol	Modbus master and slave; free protocol			
		Max number of slaves	1			
		Baud rate bps	9600, 19200, 38400, 57600, 115200			
CAN	Number of interfaces	1 Way				
	Support Protocol	CANopen Master Protocol				
EtherNet	Number of interfaces	1 Way				
	Function	Max number of clients (masters): 1; Max number of servers (slaves): 125				
	Data transfer speed	10M/100Mbps				
	Total number of TCP connections	16				
EtherNet	Modbus TCP	Max number of clients (masters): 1; Max number of servers (slaves): 125				
	Socket	Maximum number of connections: 16 (UDP+TCP)				
	Cables	Standard Industrial Ethernet Communication Cable				
EtherCAT	Topology	Linear				
	Transmission medium	Standard EtherCat communication cable				
	Max transmission distance between nodes	100M				
	Max number of slaves	6	8	12	16	32
	Communication cycle	Minimum 2ms				
EtherCAT	Support Protocol	EtherCat Master				

Environmental specifications

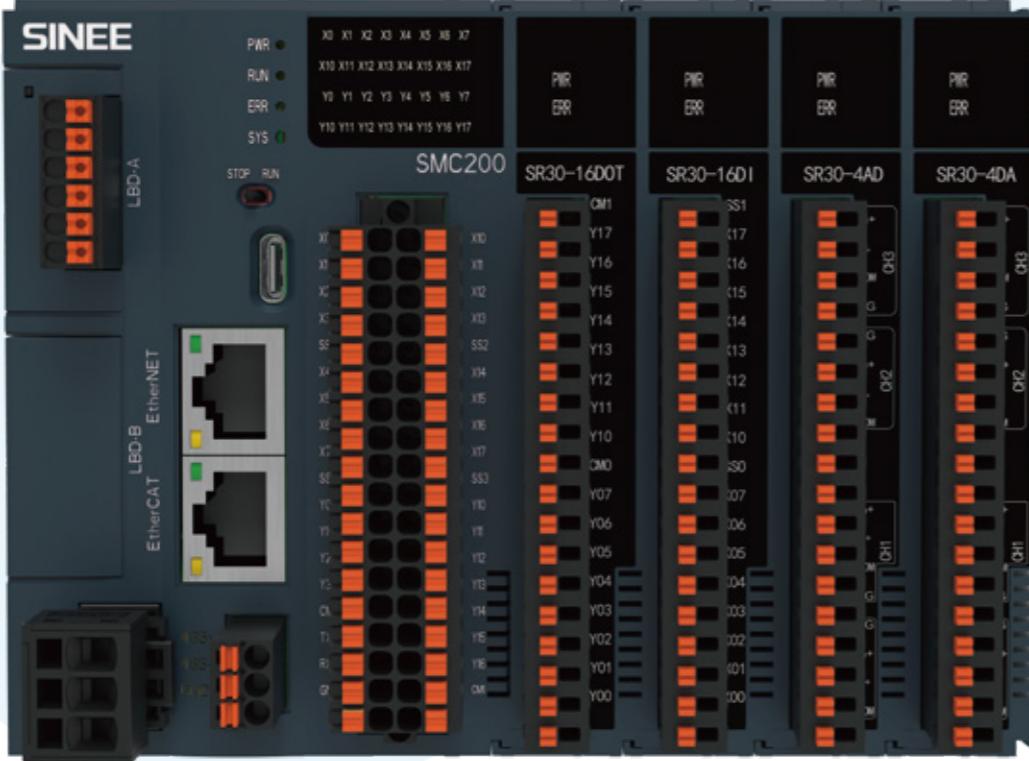

Item	Specifications
Operating temperature	-10 ~ +55°C
Storage temperature	-25 ~ 80°C
Relative humidity	5% ~ 95% (No condensation)
Altitude	Below 2000m
Pollution level	2
Protection level	IP20
Cooling method	Passive heat dissipation, natural air cooling
Installation	Rail mounting 35mm

Power specifications

Item	Specifications
Input power spec.	24V ± 10%, 3A
Undervoltage level	18V

SMC200 Series Small PLC

Multiple Bus

Equipped with EtherNET and EtherCAT as standard, supporting multiple communication protocols

Easy Programming

Support ST language programming function, easy to write complex algorithms and logical functions

Superior Performance

Supports up to 4 pulse axes or 8 bus axes, bus synchronization cycle 1ms

Compact Structure

Blade-type expansion, quick and easy assembly, saving space

Flexible Expansion

Supports a variety of expansion modules + optional accessories to meet various application requirements

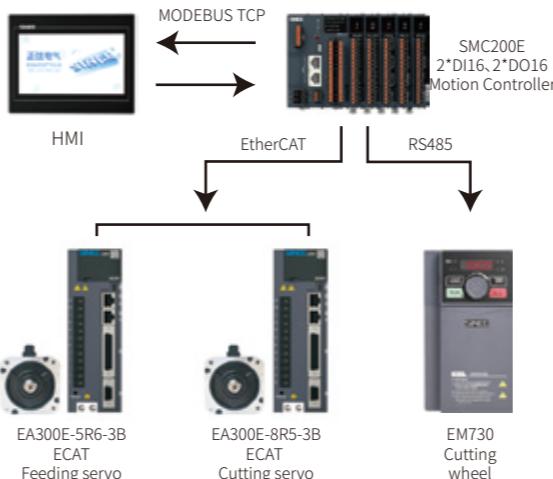

Technical Support

Provide comprehensive technical support and application services

Circular saw machine solution

The circular saw industry has an increasing demand for high-precision and high-efficiency production equipment. As a key device, motion controllers are increasingly used in circular saw production equipment.

Composition

Configuration List

NO	Components	QTY	Illustration
1	Servo Drive (Feeding)	1 Set	EA300E-5R6-3B (Absolute value) Servo Drive SES13-0R8-15-3FBY (850W) Motor
2	Servo Drive (Cutting)	1 Set	EA300E-8R5-3B (Absolute value) Servo Drive SES13-1R8-15-3FBY (1800W) Motor
3	PLC Controller	1unit	SMC-200E (BUS)
4	Right Module	2units	SR30-16DI*2 SR30-16DO*2
5	HMI	1 unit	FE6070H (7" 16:9 TFT LCD)
6	Inverter (Cutting)	1 unit	EM730

Process Steps

S/N	Step	Illustration
1	Power-on initialization	Determine whether there is material in the feeding clamp
2	Receives material	The photoelectric function of the material rack determines whether there is material in the material rack. If there is material, the feeding shaft reaches the material receiving position and receives the material.
3	Material judgment	After receiving the material, the feeding axis moves step by step in the photoelectric direction of the material head, and is sensed by the photoelectric switch of the material head. The shaft position is used to determine the length of the material head and calculate whether it meets the length of the current workpiece
4	Workpiece length judgment	Workpiece length > worktable length. Multiple transports Workpiece length < worktable length. Single delivery
5	Cutting	The workpiece is transported to the designated cutting position by the feed shaft. The feed shaft clamp is released. The fixed clamp is tightened. The cutting shaft starts to move downward and cut.
6	Continue feeding	Cycle cutting: the feed axis retreats to the length of the workpiece, the clamp is tightened, and the material is fed, and the cycle continues Single-step cutting: The feeding axis reaches the material receiving position, and each time the cutting axis finishes cutting, it moves forward a distance the length of the workpiece.
7	End material Judgment	The feeding axis moves backward to feed the material. When the material tail switch sensing signal disappears, the feeding axis stops, records the current position of the feeding axis, and determines whether the current remaining material length meets the length of the workpiece. If it does, continue feeding. If it does not meet the length, discard the material.
8	Discard material	The remaining material is not enough to be processed into qualified parts, and the material is discarded

Features

RS485 communication: Read and write inverter parameters

Ethernet communication: Real-time monitoring of program parameters

Automatic switching: Automatic calculation and switching of long and short materials

Rich modes: Including manual, semi-automatic, fully automatic, etc.

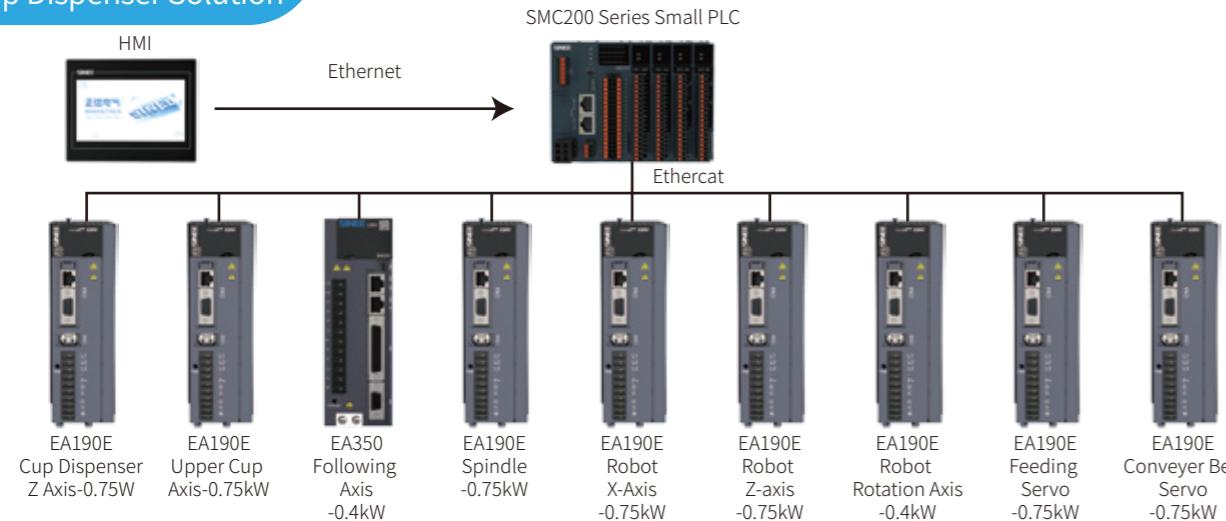

Rich functions: Automatic material turning, automatic feeding, residual material separation, automatic chip removal, etc.

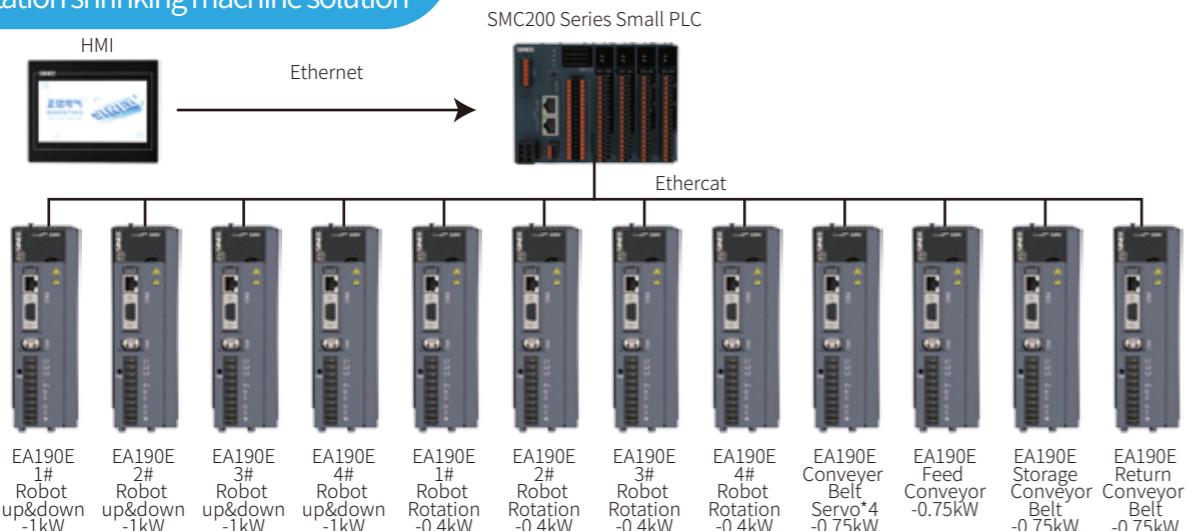

Vacuum cup production solutions

With the continuous advancement of technology and the changing market demand, motion controllers play an increasingly important role in the vacuum cup production industry, bringing more innovation and changes to the vacuum cup production industry.

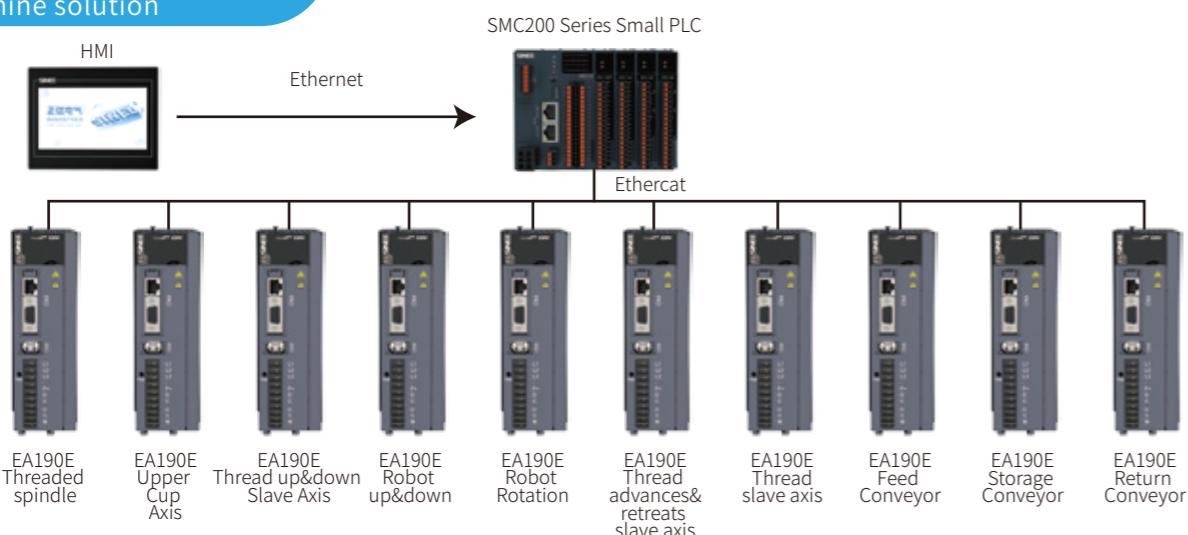

Cup Dispenser Solution

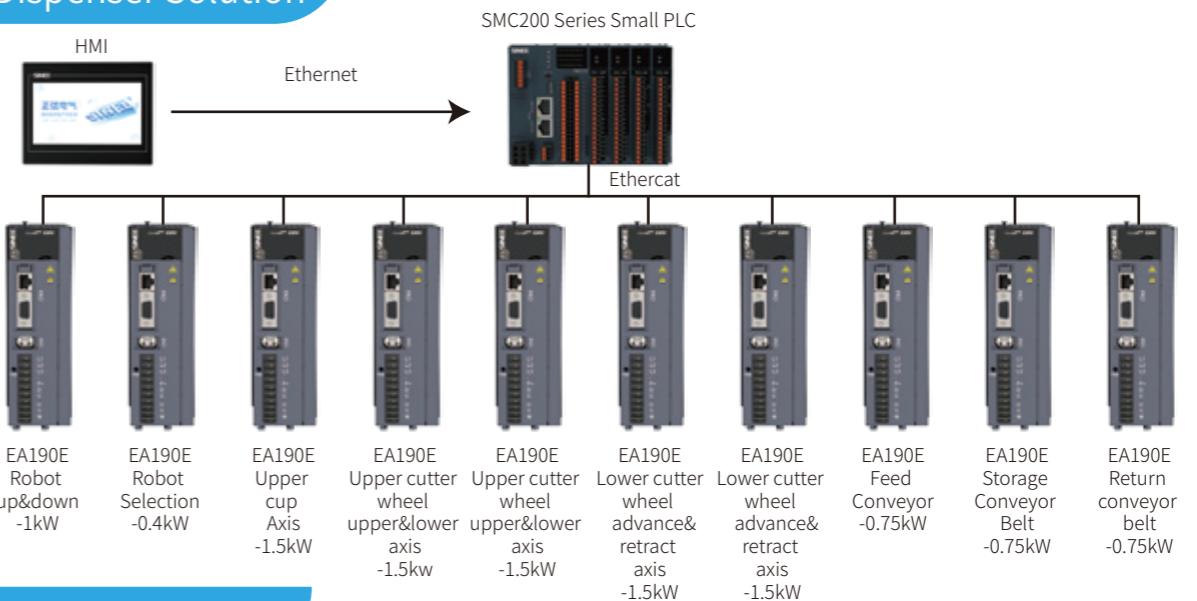

Four-station shrinking machine solution

External and internal thread machine solution

Cup Dispenser Solution

Solution Advantages

01

Easy to install

Using EtherCAT communication method, Convenient wiring, Improve assembly efficiency, and Save debugging time

02

Save Cost

The complete set of automatic lines saves control cables for EtherCAT bus servos to reduce equipment costs

03

Easy to debug

The human-computer interaction interface is intelligent and user-friendly, and can be operated without complicated debugging Equipment

04

Easy to maintain

When equipment fails, the fault is accurately located, making it easier for maintenance personnel to perform maintenance.

05

Visualization

Real-time display of current equipment operation status, equipment processing time and output

Solution performance advantages

Processing efficiency

Production efficiency:
4.5s/pcs

Pass rate

Processing qualification rate: 99%

Positioning accuracy

Positioning accuracy:
±0.05mm

Calendar	RTC	Built-in	Built-in
	Ethernet	1-channel 10M/100M adaptive	1-channel 10M/100M adaptive
Communication Port	USB port	1 USB Host 2.0 port	1 USB Host 2.0 port
	Serial communication port	COM1: RS232/RS485	COM1: RS232 COM2: RS485/RS422; COM3: RS485
	IoT	-	Expandable 4G or WiFi
	Rated Power	< 10W	< 10W
Power Specifications	Rated Voltage	DC24V, working range DC 9V-28V	DC24V, working range DC 18V-30V
	Power Protection	No isolation	With lightning surge protection
	NVS	< 5mS	< 5mS
	PCB Coating	/	Default: None (optional)
Structure	Overall Size	274*193*40mm	278*219*43mm
	Opening Size	260*180mm	260*202mm
	Mechanical Mechanism	Engineering Plastics	Engineering Plastics
	Protection level	Front panel: IP65; rear cover: IP20	Front panel: IP65; rear cover: IP20
	Weight (g)	About 1Kg	About 1.2Kg
	Installation	Panel embedded	Panel embedded
Operating Environment	Operating temperature	0~50°C	0~50°C
	Storage temperature	-20~60°C	-20~60°C
	Ambient humidity	10~90%RH (no condensation)	10~90%RH (no condensation)
	Earthquake resistance	10~25Hz (2G/30 minutes in X, Y, and Z directions)	10~25Hz (2G/30 minutes in X, Y, and Z directions)
	Cooling method	Natural air cooling	Natural air cooling

Product Dimensions

Opening size : 192mm W x 138mm H

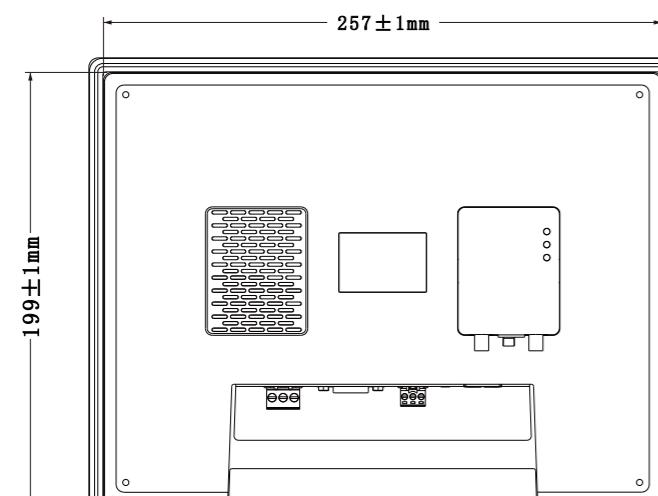

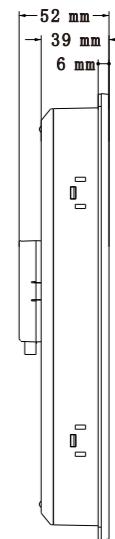

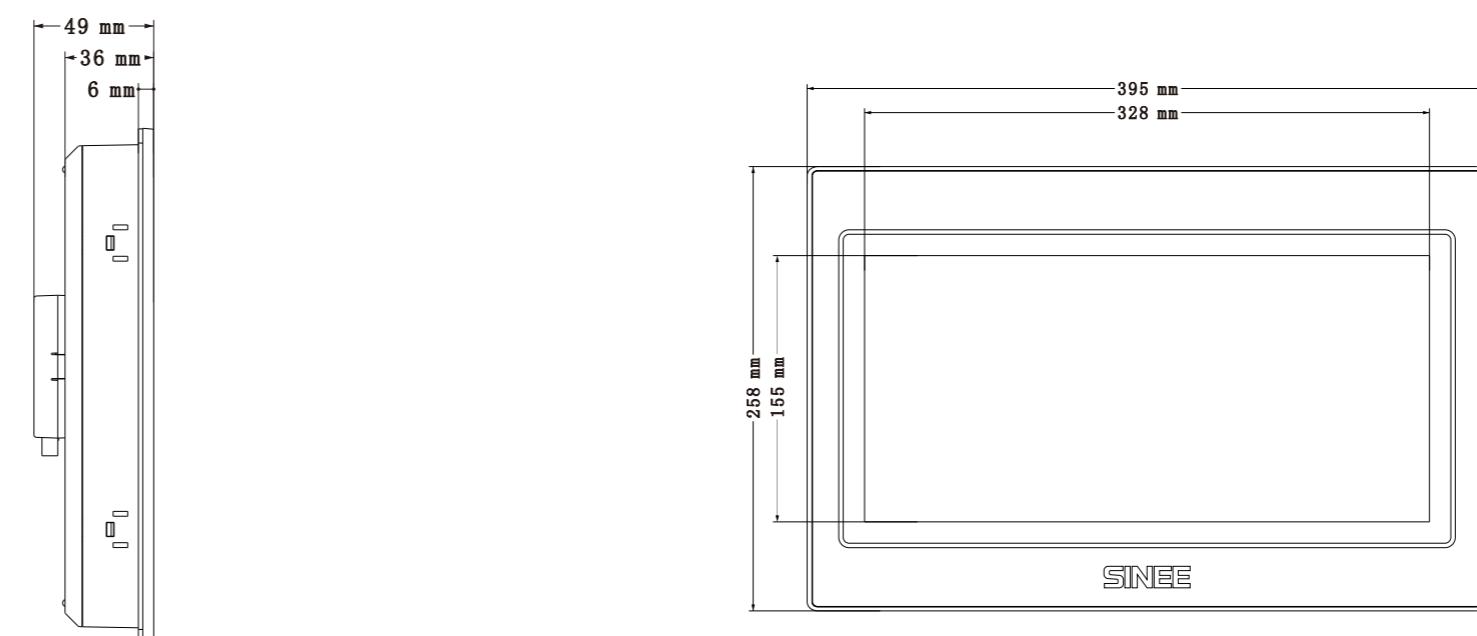

Product Dimensions

10.2-inch touch screen design size

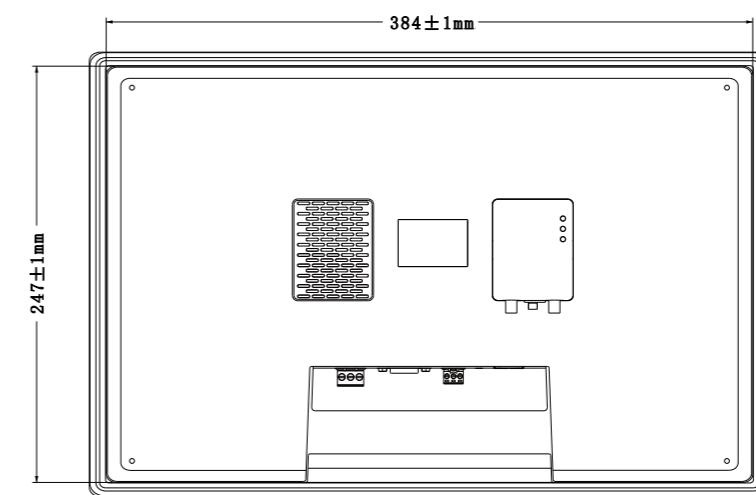

Product Dimensions

15.6-inch touch screen design size

Opening size: 259mm W x 201mm H

Opening size: 386mm W x 249mm H

Quick Selection Table

Controller host selection table

Order Model	Specifications Overview	Order code
SMC300-006E	EtherCAT bus axis*6, EtherNET*1, RS485*1, 16 inputs and 8 outputs, 2 accessory cards, supports 16 expansion modules	01060005
SMC300-008E	EtherCAT bus axis*8, EtherNET*1, RS485*1, 16 inputs and 8 outputs, 2 accessory cards, supports 16 expansion modules	01060004
SMC300-012E	EtherCAT bus axis*12, EtherNET*1, RS485*1, 16 inputs and 8 outputs, 2 accessory cards, supports 16 expansion modules	01060003
SMC300-016E	EtherCAT bus axis*16, EtherNET*1, RS485*1, 16 inputs and 8 outputs, 2 accessory cards, supports 16 expansion modules	01060002
SMC300-032E	EtherCAT bus axis*32, EtherNET*1, 16 inputs and 8 outputs, 2 accessory cards, supports 16 expansion modules	01060001
SMC200-004E	200K pulse axis*4, EtherCAT bus axis*4, EtherNET*1, RS485*1, RS232*1, 16 inputs and 11 outputs, 2 accessory cards, support 8 expansion modules	01060008
SMC200-006E	200K pulse axis*4, EtherCAT bus axis*6, EtherNET*1, RS485*1, RS232*1, 16 inputs and 11 outputs, 2 accessory cards, support 8 expansion modules	01060007
SMC200-008E	200K pulse axis*4, EtherCAT bus axis*8, EtherNET*1, RS485*1, RS232*1, 16 inputs and 11 outputs, 2 accessory cards, support 8 expansion modules	01060006

Controller Module Selection Table

Classification	Order Model	Adaptation host	Specifications Overview	Order code
Right expansion	SR30-16DI	SMC300/200 series	16-point digital input, supporting both source and sink modes	02310346
	SR30-16DOT	SMC300/200 series	16-point digital output (NPN transistor)	02310345
	SR30-4AD	SMC300/200 series	4-channel 16-bit analog input; Supported modes: -10V~10V, 0V~10V, 0mA~20mA, 4mA~20mA	02310344
	SR30-4DA	SMC300/200 series	4-channel 16-bit analog output; Supported modes: -10V~10V, 0V~10V, 0mA~20mA, 4mA~20mA	02310343
	SR30-4TC	SMC300/200 series	RTC clock	02310397
	SR30-8DI8DO	SMC300/200 series	8 input points, 8 output points	02310399
Left expansion	SL30-4DI	SMC300/200 series	4-point digital input, supporting both source and sink modes	02310349
	SL30-4DOT	SMC300/200 series	4-point digital output (NPN transistor)	02310348
	SL30-C25	SMC300/200 series	1 channel RS485 or RS232	02310352
	SL30-RTC	SMC300/200 series	RTC clock	02310351
	SL30-C25-RTC	SMC300/200 series	1 RS485 or RS232, support RTC clock	02310353
	SL30-CCAN	SMC300 series	1-way CAN and RS485 communication	02310355
	SL30-2DI-H	SMC200 series	2 differential inputs	02310374
	SL30-2A2D	SMC200 series	2-way analog input 2-way analog output Support mode 0V~10V	02310396

Quick Selection Table

Accessories Selection Table

Classification	Order Model	Adaptation host	Specifications Overview	Order code
Host terminal	DC24V power terminal	SMC300/200 series	SC-T3005003SB0X	14120059
	RS485 Terminal Block	SMC300/200 series	PL1.5B-03-3.50-03-BK	14120085
	Host IO terminal	SMC300/200 series	TP381P-28F-18P-BK	14120086
Left expansion terminal	Button battery	SL30 Extension modules	CR2032	24010004
	SR30 expansion module terminal	SL30 Extension modules	PL1.5B-06-3.50-03	14120098
Right expansion terminal	SL30 expansion module terminals	SR30 Extension modules	TP381P-09-18P-BK	14120087

HMI Selection

Size	Function	Model	Specifications Overview	Order Code
7 inches	Economical	VMi10-07C10	Serial communication port*1, 128M memory	230400431
	Economical network port	VMi10-07C11	Network port*1, serial communication port*1, 128M memory	230400441
	Universal network port	VMi10-07C21	Network port*1, serial communication port*3, 128M memory	230400451
	IoT	VMi10-07C31	Network port*1, serial communication port*3, 128M memory, can expand the IoT	230400461
10 inches	Economical network port	VMi10-10C11	Network port*1, serial port*1, 128M memory	230400471
	IoT	VMi10-10C31	Network port*1, serial communication port*3, 128M memory, can expand the IoT	230400481
15.6 inches	IoT	VMi10-15C31	Network port*1, serial communication port*3, 1G Flash+8G DDR3, can expand the IoT	230400491

HMI module selection

Modules	Model	Order code
WIFI	VM10-WIFI	43040006
4G	VM10-4G	43040007
RS485	PL1.5B-03-3.81-0.0	14100118
HMI power terminal	PL2.5B-03-5.08-00-GY	14100122

Controller programming software

Name	Adaptation host	Overview	Download
CODESYS V3.5 SP18	SMC300 Series	SMC300 series motion controller programming software, recommended version: 3.5.18.0	www.sinee.cn
SineeStudio	SMC200 Series	SMC200 series small PLC programming software	www.sinee.cn
SINEE VMi Manager	VMI10 Series	HMI programming software	www.sinee.cn
